ISO/IEC 17025 Accredited

ISO/IEC 17025 Accredited

Our dedicated staff knows how important your paternity test is to you and is committed to ensuring the accuracy, confidentiality, and convenience of our accredited testing.

Paternity Testing

Undertaking a Paternity Test is one of the most significant events that you will ever undergo. The test results will affect the rest of your and the child's lives.

This is why the Paleo-DNA Laboratory offers accredited testing that guarantees the maximum probability of confirmed paternity relationship or excluded-from-paternity-relationship results.

Because paternity is an extremely private matter, our dedicated staff handles the information about each individual case with unconditional confidentiality.

Specimens can be collected at your physician's office or other locations. We also offer a DNA swab kit, which is convenient, painless, and totally safe.

We can also do the test using other material such as used chewing gum, bloodstains, or hair.

Each Paternity Test (mother, child, alleged father) will be processed within 5 business days of receipt of samples.

Quicker turnaround times are available for an additional fee.

Accredited

We provide Standards Council of Canada CAN-P-4D and CAN-P1578 forensic biology/ DNA human identification services for mitochondrial DNA, STR, and Y-STR samples in our ISO 17025 accredited laboratory.

Accurate

We use the latest technology, leading edge equipment, and highly qualified and experienced scientists.

Each case is done in duplicate and compares 16 different genetic regions.

Guaranteed

We guarantee the maximum probability of confirmation or exclusion from paternity.

Reliable

Physicians, lawyers, police forces and government organizations such as the United Nations have used our services.

Fast & Convenient

Results are available in 5 business days or fewer.

Our DNA swab kit allows you to collect the DNA sample from inside your cheek in the privacy of your physician's office or at your own home.
